Does Bahama have a solar power project?

The Bahamian government owns and manages property rooftops, parking lots and green spaces, on which solar power projects could be developed. Several projects that capitalize on that solar power potential are underway, Jones Bahamas points out.

Is solar a good option in the Bahamas?

On a kilowatt-hour (kWh) by kilowatt-hour basis, solar's your best, but you need to add battery energy storage capacity in order to reach higher levels of penetration," he noted. "Nassau's [the Bahamas' largest city] is a pretty big grid, and it can take a fair bit of solar without storage," Burgess continued.

How will the family Islands solar power system work?

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030.

Does New Providence need a solar grid?

An interactive, two-way grid is required given any grid-connected distributed solar or renewable energy, however, he added. "Studies have shown that the New Providence grid (which serves Nassau) can take at least 8 megawatts (MW) of solar without worrying about storage.

Is the Bahamas a difficult place to generate electricity?

BPL Chairman Donovan Moxey was quoted in a Tribune Business news report. The Bahamas is a very difficult place to generate electricity, distribute it and sell it, even as compared to other Caribbean islands, Chris Burgess, Islands Energy Program projects director, told Solar Magazine.

How much energy does New Providence use?

New Providence's energy consumption totals around 260 MW, according to a local news report. "The MOU is the first step towards a desired long-term power generation pact between BPL and Shell and bringing strategic change to electricity generation and supply in New Providence," BPL's Moxey was quoted as saying.
