

Purchase a solar power system

Should you buy or buy a solar system?

Consumers have different financial options to select from when deciding to go solar. In general, a purchased solar system can be installed at a lower total cost than system installed using a solar loan, lease, or power purchase agreement (PPA). If you prefer to buy your solar energy system, solar loans can lower the up-front costs of the system.

Where can I purchase solar panels?

You can buy solar panels from many businesses that specialize in selling and installing them for homes. You can find solar panel suppliers and installers in your area by searching online. To help you get started, CNET has a list of the best solar panel companies. Additionally, you can shop for solar panels at major home goods stores like Home Depot.

Why should you buy a solar system?

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Tax incentives and flexible financing options ensure you get the best price for your solar system. Power your home with emissions-free, renewable energy directly from the sun.

Where can I buy solar equipment?

Like wholesale resellers, Amazon is another way to purchase solar equipment directly. Many people commonly purchase solar panel kits from Amazon that include the majority of equipment necessary for getting a solar panel system up and running (i.e., wiring, solar panels, the inverter, etc.).

How much do solar panels cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total system costs. Average solar panel system cost by system size

What financing options are available for going solar?

Many \$0-down financing options are available for going solar, including ownership (i.e., solar loan) or third-party-owned (i.e., leases) solutions. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a power purchase agreement (PPA).

Things to consider about the Enphase 5P. The downside is, of course, lower capacity means less availability for power if the grid goes down. But, if you live in an area with a relatively stable grid that isn't prone to long-duration outages, the 5P might just get the job done.

Cash Purchase: If you have the funds available, purchasing your solar system outright can avoid interest

Purchase a solar power system
