Do I need a 12V inverter?

But you need an inverter to power anything that plugs into a standard wall outlet, like blenders, induction cooktops, microwaves, battery chargers, coffee grinders, or power tools. Power inverters are designed to take a specific voltage input, meaning that if you have a 12V battery bank, you need a 12V inverter.

What is a 12V inverter cable?

Join a KickAss community of over 500,000 adventure lovers. Our 12V inverter cables are designed for maximum efficiency and durability, providing a secure connection between your battery and inverter. These cables are built to handle high current loads, ensuring your inverter delivers consistent power to your appliances.

What does a 12V inverter do?

An inverter is a device that converts DC electrical current (the 12V power coming from your van's batteries) to AC current (the type of electricity that comes out of a standard wall outlet). With the help of a good inverter, you can still power all of your appliances from your van's 12V electrical system.

How do I choose a battery inverter?

Ensure that the inverter matches your battery's voltage (typically 12V or 24V). Larger appliances or higher power consumption needs may require higher-capacity inverters and battery systems, such as 24V or even 48V setups. Power Consumption: Low (suitable for small devices like phone chargers and LED lights).

What size battery inverter do I Need?

It's a good idea to size up based on what your battery bank can accommodate, but don't go larger than 3000W on a 12V electrical system. For most vanlifers, a 1000W-1500W inverter will cover basic power needs, but if your battery bank is big enough, 2000W or larger inverters allow for more flexibility.
