

300mAh cylindrical lithium battery

What is the difference between 800mah and 300mah batteries?

Both batteries are 7.4 volts, 2 cells, and use the same charger. The only difference is their Ah rating: 300mAh for one battery and 800mAh for the other. Question 1: Will using an 800mAh battery instead of a 300mAh battery in a plane cause any damage to the electronics or motor? Question 2: If no damage occurs, will the 800mAh battery provide a longer flight time for the plane?

Who makes lithium polymer batteries?

LiPol Battery Co., Ltd. is the industry leader in manufacturing lithium polymer batteries and high discharge rate lithium polymer battery, range from 0.7mm-13mm, 20mAh-10000mAh. We also provide customized battery service, assembled battery, and connector cables.

What is a 403030 battery?

Support free samples to test. The 403030 is a 3.7V 300mAh rechargeable polymer battery which can quickly be integrated into a wide range of smart electronic devices. The battery comprises a single prismatic cell in a 1-series, 1-parallel configuration.

What is the capacity of a 12V 300Ah lithium battery?

3.84 kWh is the 100% usable capacity of the Ampere Time 12V 300Ah lithium battery. This means you can use up to 3.84 kWh of power from this battery.

What is the size of LiPo battery LP502035?

This LiPo Battery LP502035 3.7V 300mAh 1.11Wh size is 5.0 x 20 x 36mm, it with a protection circuit module and wires. Ask LiPo Battery Data-sheet & Quotation now. The above default shipping fees (\$99.00 & \$199.00) meet the following countries. If your country is not listed, please contact us to request another shipping fee for your country.

Rapid charging: Our LTO battery is a rechargeable battery with a higher charging current than typical lithium-ion batteries which allows them to charge faster and safer. Micro-size: Our micro LTO battery is lightweight and leaves a small footprint, making it ideal for constrained space applications. Long life: These batteries have a high cycle life with no significant capacity ...
