The MultiPlus-II will prevent overload of a limited AC source, such as a generator or shore power connection. First, battery charging will automatically be reduced when otherwise an overload would occur. The second level will boost the output of a generator or shore side supply with power taken from the battery.

Appendix II: Parallel function 1. Introduction This inverter can be used in parallel with three different operation modes. 1. Parallel operation in single phase with up to three units. The supported maximum output power is 15KW/15KVA. 2. ...

For a 48V 100A battery with a 48V to 220V inverter, we can get 220V and 21.8A as the maximum power draw (100A/4.58= 10.9A). 220V/48V= 4.58, so the step up voltage is 4.58. Also important to note that in a home solar system, you should appropriately have wires rarted for the current flowing through the system.
