

5W foldable solar charging panel

Which solar panel is best for small devices?

For charging small devices, like phones or small batteries, the Renogy works well; it saves size and weight by sacrificing charge time with its low wattage. A unique panel from our fleet of foldable solar panels, the E.Flex5 shines as a lightweight, affordable, and simple panel.

Are folding solar panels waterproof?

It's durable and waterproof, even though the panel itself does not come with a canvas outer layer, like most folding solar panels. The E.Flex5 is an excellent choice for simple charging tasks for those concerned about weight and portability. The size and weight of this panel make it the most portable of the panels we tested.

How does a solar panel work?

Solar panel folds down to the size of a backup and can be carried with two handles for easy portability. Drop any of your wireless-charging enable devices for a quick charge when all of your ports are full. Available in solid red and strobe, the rear lighting module ensures you can see and be seen. How SolarPanel gets the most from the sun.

Are portable solar panels any good?

It's small and lightweight and works quite well despite its size. This take on the portable panel does not have multiple folding panels that expand as it is opened. Instead, what you see is what you get: one panel with the solar cells exposed all the time.

Are Renogy solar panels a good buy?

The small but mighty Renogy 5W is a good buy since it is inexpensive and very portable. Our Award Winner for Lightweight Design, the Renogy 5W stands out as the lightest and smallest of the models we tested this year. It's durable and waterproof, even though the panel itself does not come with a canvas outer layer, like most folding solar panels.

How long does it take a Renogy 5W to charge?

When set out in full sun with the task of charging a 6,000 mAh external battery, the Renogy 5W was able to charge from 0 to 9% in four hours. This data is pretty eye-opening, especially when compared to a larger watt panel, which charged the same battery to full in three and a half hours.
