Along with variations in construction methods, the choice of dielectric material has strong influence on a given device's relative cost, size, parametric stability, and suitability for a ...

A supercapacitor of a given weight cannot store nearly as much energy as a lithium-ion battery can. However, a supercapacitor can discharge far faster than a battery can. So while a supercapacitor (at present) cannot be used to power a car for hundreds of kilometres like a battery can, there are power application where a supercapacitor can serve.
