Romania's energy ambitions are closely linked to the general objectives of the EU energy and climate policy. Thus, Romania has set a target of 30.7% for the share of renewable energy sources in gross final energy consumption for the 2030 time horizon through the National Integrated Energy and Climate Change Plan 2021-2030 -

efficient energy sources (including biomass) with heat pumps to reach the 25% share. Considering the EU targets of increasing RES for heating and cooling by 1.1% per year between 2026 and 2030, the sectoral target assumed by Romania through the NECP should reach 47.3%. II. Storage and the electricity distribution and transmission network
