

Do I need an outdoor power supply when going to Prague

Do you need a voltage converter in Prague?

In the Czech Republic, where the historic streets of Prague and stunning castles await, you'll find type C and E outlets. These are not the same as in the US, so a travel adapter is a must-have. Type C outlets also work with type C and F plugs. Type C plugs also fit into type E outlets.

What type of power adapter should I use in Prague?

Power adapter with a 230V and 50Hz rating. In Prague, Czech Republic, it is advisable to use a Type C or Type E adapter for electrical outlets. When it comes to language, the primary language spoken in Prague is Czech, but English is commonly used in tourist areas, making communication easier for visitors.

Do I need a power adapter in the Czech Republic?

As an American, you're going to need a Type A/B to Type C/E power adapter to charge your devices in the Czech Republic. These are more commonly known as North America to Europe adapters. We recommend bringing a Universal Adapter, which will have you covered not only in the Czech Republic but in more than 100 countries around the world.

Do I need an electrical adapter when traveling to Prague?

However, it is still advisable to carry an adapter as a backup. Surge Protection: Consider using an adapter with built-in surge protection to safeguard your electronic devices from power surges or voltage fluctuations. In summary, when traveling to Prague, it is crucial to have the right electrical adapter for your devices.

What are the different types of power plugs in Czech Republic?

In Czech Republic, there are two main types of power plugs and outlets: Type C and Type E. Type C: Type C plugs have two round prongs on either side of the plug, commonly known as Euro plugs. Mostly used in Europe, South America, and Africa. Type C outlets can be fit with either Type E or Type F plugs.

Do I need a voltage converter in the Czech Republic?

In North America, the standard plug types are Type A and Type B, with a voltage of 120V. Since the Czech Republic uses Type C and E outlets, you'll need a Type A/B to Type C/E adapter. Additionally, as the voltage in North America is different, you may also need a voltage converter for devices that are not dual-voltage.

If you have indoor or outdoor wall outlets - but they aren't in a conveniently close location, extension cords are a great solution. Use an extension cord at least as long as you need and is rated for outdoor use. Only plug lights and extension cords into outlets connected to preinstalled fuses or an appropriately installed circuit breaker.
