

# El Salvador Outdoor Power Supply Monopoly Number

What is El Salvador's energy supply?

El Salvador's energy supply primarily comes from fossil fuels, such as oil, gasoline, diesel, liquid petroleum gas (LPG), kerosene, and bunker fuel. Natural gas does not play a role in El Salvador's energy supply.

What role does natural gas play in El Salvador's energy supply?

Natural gas does not play a role in El Salvador's energy supply. Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.

Does El Salvador have a capacity to conduct renewable projects?

El Salvador has the national, political will to conduct renewable projects, as evidenced by the numerous incentives provided, the dire climate risks in the country, and their regional partnerships. While the institutional capacity is still catching up, to say they don't have any capacity would be false.

What are the major sources of energy in El Salvador?

For energy purposes, volcanoes provide major sources for geothermal power. El Salvador also contains 307 kilometers of Pacific Ocean coastline, four main lakes: Coatepeque, Ilopango, Suchitlan, and Guija, and approximately 350 rivers.

How much electricity does El Salvador produce?

El Salvador has three biomass plants which produce about 109.5 MW of electricity. Central El Salvador receives high levels of solar radiation that are conducive to solar generation. Most of the country's installed solar panels are in government buildings, schools, manufacturing plants, and universities.

Why did El Salvador start auctioning power?

Under the General Electricity Law of 1996, auctions were made the preferred method to purchase power in El Salvador, specifically pertaining to geothermal and hydroelectric power sources. This was one way in which El Salvador began to incentivize investment in, and development of, renewable energy sources.

The Monseñor Arnulfo Romero International Airport in El Salvador is the third largest airport in Central America. It is located near the capital of San Salvador and opened in 1980. At the time, the airport was designed for an annual capacity of 400,000 passengers. This number had risen to 3 million by 2016.
