

Folding flat photovoltaic container wholesale in Brno Czech Republic

What is a solarfold photovoltaic container?

at full power. The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and smoothly along a length of around 123 metres.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a folded solarcontainer?

Folded Solarcontainer is compact and easy to off-load and unload. By removing all outer structural parts we ensure total panels exposure (no shades). Solar panels lay flat on the ground. This position ensures maximum energy harvest. System ensures fast retraction time making it safe in all weather conditions.

How do foldable solar panels work?

the foldable photovoltaic panels are tucked inside a mobile solar container. The mobile solar container can take up to five hours to assemble and make it operational. Its base is made up of a solid floor frame, and mounted on this frame is the photovoltaic panels' rail system and the folding mechanism.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Folded Solarcontainer is compact and easy to off-load and unload. By removing all outer structural parts we ensure total panels exposure (no shades).

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

The mobile solar container contains 200 PV modules with a maximum nominal power rating of 134kWp, and can be extended with suitable energy storage systems.
