

All sites are stand-alone, except for one 25MW project co-located with solar and wind. Four of these sites are large (49.9MW) stand-alone projects. One site will provide power for ultra-rapid electric vehicle charging. Nine of ...

RWE"s 249MWac Limondale PV plant. The 8-hour battery project will be built on an adjacent site. Image: RWE. RWE will proceed with an 8-hour duration large-scale battery storage project in New South Wales (NSW), while a tender for more long-duration resources has launched in the state.

Responding to Energy-Storage.news" request for comment after our story was published, CPA confirmed the project"s choice of lithium-ion technology and that it would be a 75MW/600MWh system. It has not yet been decided whether it ...

Image: Harmony Energy. Alex Thornton, operations director at Harmony Energy, gives us a deep dive into Pillswood, the biggest battery storage project in Europe, including the bold decision to be an early-mover into 2-hour lithium-ion BESS, in a market of much shorter duration assets.

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly EUR14 million. Image: Ministry of Energy. A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

The first phase of the world"s largest sodium-ion battery energy storage system (BESS), in China, has come online. ... the project manager said. Energy-Storage.news has been told anecdotally that one reason China is ...

The company's 400MW/2,400MWh Chickerell battery energy storage system (BESS) project was voted in favour of by six votes to two this week (29 July) at a Dorset Council meeting, according to numerous news reports. ... The project had been controversial amongst locals for its size and the fire risk that lithium-ion batteries present, but ...

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain.

Utility EWEC (Emirates Water and Electricity Company) has invited developers to submit expressions of interest (EOI) for a 400MW battery energy storage system (BESS) project in the UAE. The EOI process for

the greenfield ...

Approved by Doncaster Council on 28 January 2025, the project will feature lithium-ion battery systems supplied by Sungrow. The final investment decision (FID) is set for April 2025, paving the way for the first battery systems ...

Envision Energy is preparing to reveal lithium-ion (Li-ion) battery energy storage system (BESS) technology for long-duration applications. ... Sineng Electric enhances grid stability with commissioning of ...

Gambia is still in the early stages of scaling up its renewable energy capacity. The country's first utility-scale solar PV plant, featuring a 23MW solar array and 8MW battery ...

With its ultra-large capacity in the ampere-hour range, it is specifically developed for the 4-8 hour long-duration energy storage market. By using ?Cell 1175Ah, the energy storage system integration efficiency increases by 35%, significantly simplifying system integration complexity, and reducing the overall cost of the DC side energy storage system by 25%.

As reported by Energy-Storage.news in April last year, about 20GW of licences are expected to be issued over a period of three years. At that time, the government had already received nearly 4,400 applications totalling 221,000MW and ...

The project includes a 50MW solar power plant and an 18MWh battery energy storage system (BESS). While the RAP was approved in 2023, updates are needed to prepare ...

Envision Energy is preparing to reveal lithium-ion (Li-ion) battery energy storage system (BESS) technology for long-duration applications. BW ESS and Zelos targeting RTB on 1.5GW of Germany BESS in 2025-2027 ... firm Hidroelectrica has enlisted local firms Prime Batteries Technology and Enevo to deploy a large-scale BESS project in Romania.

The company has around 1.2GWh of battery projects construction ready in the UK. Peter Kavanagh, CEO of Harmony Energy, said: "The completion of the Contego site is a significant milestone in the continued deployment of battery energy storage in the UK, representing our largest development to date and a significant contribution to the network ...

China-headquartered lithium-ion battery maker Gotion High-Tech has produced the first battery pack at factory in California's Silicon Valley. ... Energy-Storage.news' publisher Solar Media will host the 6th Energy Storage ... Tariffs announced on "Liberation Day" have already caused battery storage project deals to fall through in the ...

The Xinhua Ushi ESS Project is a 4-hour duration project using vanadium redox flow battery (VRFB)

technology, one of the more commercially mature long-duration energy storage (LDES) technologies available on the market today. The project will enhance grid stability, manage peak loads and integrate renewable energy, Ronke Power said on its website.

Gambian utility Nawec and the country's Ministry of Petoleum and Energy is seeking proposals for a first phase 50 MW solar project with energy storage located in Soma. The ...

Project partners Canadian Solar and Axium Infrastructure have begun the operation of Crimson Energy Storage, a large-scale battery energy storage system (BESS) in Riverside County, California. California's Governor...

The Minami-Soma Substation - BESS is a 40,000kW lithium-ion battery energy storage project located in Minamisoma, Fukushima, Japan. The rated storage capacity of the project is 40,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2015 and will be commissioned in 2016.

But shortages in lithium carbonate may open up an opportunity for non-lithium batteries which can at least partially slot in to lithium battery production lines. The founder of potassium-ion battery startup Alex Girau recently pitched its technology as the one most well-placed to do this. Handful of gigafactory projects online this year

Gambia"s Ministry of Petroleum and Energy and utility National Water and Electricity Company (Nawec) have invited independent power producer (IPP) developers to submit a request for qualification (RFQ) for the ...

Gambian utility Nawec is seeking proposals for a 50 MW PV facility planned to be deployed in Soma, south of the River Gambia. The project is part of a broader solar project eventually...

This project, with a capacity of 50MWp and 18MWh battery storage, aims to be Gambia"s first utility-scale independent power producer (IPP). Upon completion, it is also expected to serve as the cornerstone for a future West African Power ...

Two years ago, Energy-Storage.news reported on the first phase of a 200MW/800MWh vanadium redox flow battery (VRFB) coming online. Recently published statistics from China's National Energy Administration said that the country's capacity of so-called "new-type energy storage" hit 31.39GW by the end of 2023. The administration said that ...

Energy storage is already proving its worth in the state. Energy-Storage.news reported yesterday that according to CAISO, California's main grid and wholesale markets operator, battery storage deployments grew 12-fold on its network in 2021 from 2020 figures.
