

# Greek Solar Gigawatt Factory

How many active energy communities are there in Greece?

Active Energy Communities: Greece is a frontrunner,when it comes to the community energy movement,with an establishment of over 1,600 active energy communitiessince August 2023.

How does energy sharing work in Greece?

Energy sharing is facilitated through energy communitiesand Greece is a frontrunner in establishing energy communities,with over 1,600 communities active since August 2023. Recent legislation introduced new types of energy communities,prioritising self-consumption projects and limiting profit distribution to prevent exploitation.

What impedes solar development in Greece?

Currently,probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece,including rooftop solar,is grid availability. In many areas,applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

Does Greece have a plan for rooftop solar PV?

November 2023,Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables,from which 13.4 GW came from solar power capacity. However,there is no roadmap or strategyat this time in regards to rooftop solar PV in particular.

Is Greece ready for a new 'energy community'?

Greece is a frontrunnerin establishing a new type of civil cooperative,the "energy community" (Law 4513/2018),including most of the criteria in the EU directives (effective control,open and voluntary participation,local proximity,etc.).

What is the penetration rate of smart meter in Greece?

Low smart meter penetration: Due to legal proceedings on a specific case with a Distribution System Operator (HEDNO),the installation of smart meters in Greece stalled and is only at a penetration rate of 6%. Although,this will be resolved with financial support from the European Investment Bank.

According to a new report by industry association Solar Power Europe, Greece's total installed capacity last year grew by 20% with 1.6 Gigawatt of installed capacity added.
