

How much is a 450w mobile outdoor power supply

It's more than enough. PCPP calculator way overestimate wattage requirements. It'll draw more like 250-300 watts under heavy loads. As for the 100 watt headroom, a good PSU can handle any load 24/7 without fault within its warranty period.

going to a larger power supply gives you higher load on 12v rail. if your taking about two supplys from the same vendor like the cx line. how much power any power supply uses depends on the load size. if both units have a 300w load then both are going to be the same efficient. when your on the boards for a long time you see a lot of people ...

So currently i am on a 450W corsair psu, have had it for nearly 6 years now, the thing is i purchased a new Graphics card -> RX6650XT and its another week or two before i get a new 600W psu for it, realistically speaking WHAT WOULD happen if i tried running the RX6650XT with the 450w PSU. The ...

450W Power Supply. Fast Delivery. Across India. EMI options. 100% Secure Payment. Stupendous Discounts. Amazing discounts on Products. Customer support. ... Mobile Streaming PC PC Streaming PC VR Gaming PC Simulator PC Music Production PC ...

Too much power is fine as the psu will only draw as much power as it needs. No clue what a "black" rating is, but if the 600w psu is known to be reliable go for it. If the 450w psu is more reliable, then go for that. Never try cheaping out on a PSU because if it fails, you're putting every component in your computer at risk of failure.

The average recommended power supply for a GTX 1650 graphics card is 300 watts minimum, but it entirely depends on the rest of your setup. If you have a mid-spec PC then it might make sense to upgrade to a 350-400 watt power supply instead. ... Is a 450W PSU enough for GTX 1650? A 450-watt power supply is more than sufficient for handling a GTX ...
