

Inverter 60v to 380

The SWP5000-DA60 is an inverter (converter) that converts a DC voltage from 60V to 230V AC voltage (pure sine wave) and can supply an AC current of 21.7A. The continuous power is 5000W but it can provide a peak power of 10000W.

String inverters aggregate the output of groups of solar panels in a system into "strings", which are then connected to a single, central inverter where electricity is converted from DC to AC electricity. With a string inverter, you can connect multiple "strings" of panels to the same central inverter, allowing some flexibility with your solar panel system design.
