Can PHES facilities supply peak demand in Oman?

Conducting a techno-economic case study on utilising PHES facilities to supply peak demand in Oman. This manuscript proceeds by reviewing the status of utility-scale energy storage options in Section 2. Section 3 presents the status and main challenges of Oman's MIS.

What are the challenges of the power sector in Oman?

The second challenge of the power sector in Oman is subsidies, which include subsidies to electricity customers and fuel subsidies to generating facilities. In 2016, financial subsidies reached OMR 389.9 million (AER 2019). As a percentage of the economic cost of electricity, subsidies vary between 48% in MIS and 85% in RAEC (Albadi 2017).
