

Outdoor power supply requirements in North Macedonia

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, solar power plants, a few biogas plants, and two wind power farms.

What is the Integrated National Energy & Climate Plan of North Macedonia?

The Integrated National Energy and Climate Plan of North Macedonia elaborates on all five dimensions of the Energy Union: i.e. decarbonisation (addressing two segments: greenhouse gas emissions and renewable energy sources), energy efficiency, security of energy supply, internal energy market, and research, innovation and competitiveness.

What changes did North Macedonia make to its energy policy?

While there were no other major energy legislative changes, North Macedonia continues to harmonize its energy sub-regulations with the EU Energy Community's Third Energy Package (TEP).

What is the energy mix in Macedonia?

The energy mix from domestic resources in Macedonia is dominantly based on lignite, biomass and, depending from the hydrology, electricity production from hydro power plants.

How much energy does North Macedonia need to make 1 EUR?

In fact, North Macedonia needs to spend 0.24 toe (2.8 MWh) of energy to make 1 EUR, unlike EU28 where only 0.1 toe (1.2 MWh) is needed. Proposed measures, especially in the area of energy efficiency, will increase the productivity without increasing energy consumption, bringing North Macedonia closer to the EU 28 average. Figure 11.

How to increase energy storage and system flexibility in Macedonia?

Furthermore, in order to increase the energy storage and system flexibility, among top priorities is the construction of pumped-storage hydro power plant Chebren. The objective is up to 2028 this power plant to be commissioned. The natural gas market in Macedonia is liberalized starting from 2015.

A dual voltage rated appliance will display for example "INPUT: 110-240V" on the body of the appliance or its power supply. This means that you will not need a converter or transformer but just a travel adaptor, because the Republic of Macedonia operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage ...
