Imperial Poland Imperial is one of the leading European manufacturers of lighting fittings for many different applications.

What are the advantages of solar street lamps?

Solar street lamps are used on residential roads, property access roads and other internal roads. The main advantage of solar lighting is that there is no need for power supply and quick installation. These advantages have been appreciated by many municipalities by choosing solar lamps as the main source of lighting.

Do Solar Garden lamps work?

Solar garden lamps allow you to illuminate small architecture around the house in any way. Fully automatic operation mode and high efficiency make the products work for many years. Maintenance of solar lamps is limited to occasional cleaning of the surface of the PV panel. Lamps can be easily moved when modernizing the garden decor.

How do solar sidewalk lights work?

Solar sidewalk lights can be used around the house, anywhere in the garden and to illuminate the squares. The lamps are installed by mounting them on a pole with a diameter of 60mm and switching them on. The ability to select operating modes allows you to adjust the lamp power to the local conditions and preferences of users.

What is professional industrial lighting?

The family of professional industrial lighting is distinguished by its high resistance to adverse outdoor conditions, making it a perfect solution for industry.
