Recommended UPS uninterruptible power supply

I was wondering about buying an uninterruptible power supply, so if the fuse goes, the PC will have power for long enough for me to get downstairs and flip the fuse back, or in case of need, power the PC down gracefully. Spent far too long researching this, and have gone round in circles. Main problem is that I don't trust any reviews I've seen.

An uninterruptible power supply (UPS) is an enhanced battery system that activates itself in the event of a power failure and acts as the primary power source until electronic equipment can be safely shut down. The purpose of a UPS is to maintain consistent power levels and prevent fluctuations that could damage digital or mechanical equipment.
