

San Salvador makes outdoor power supply factory

Why did El Salvador start auctioning power?

Under the General Electricity Law of 1996, auctions were made the preferred method to purchase power in El Salvador, specifically pertaining to geothermal and hydroelectric power sources. This was one way in which El Salvador began to incentivize investment in, and development of, renewable energy sources.

What is El Salvador's energy supply?

El Salvador's energy supply primarily comes from fossil fuels, such as oil, gasoline, diesel, liquid petroleum gas (LPG), kerosene, and bunker fuel. Natural gas does not play a role in El Salvador's energy supply.

What are the major sources of energy in El Salvador?

For energy purposes, volcanoes provide major sources for geothermal power. El Salvador also contains 307 kilometers of Pacific Ocean coastline, four main lakes: Coatepeque, Ilopango, Suchitlan, and Guija, and approximately 350 rivers.

Does El Salvador have hydroelectric power?

The Rio Lempais the main source of hydroelectric power within El Salvador, with the four main dams sitting on it. El Salvador also sits about 1,500 kilometers from the Equator. Their year is split into a dry season, which runs from November through April, and a rainy season from May to October.

What role does natural gas play in El Salvador's energy supply?

Natural gas does not play a role in El Salvador's energy supply. Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.

How much electricity does El Salvador produce?

El Salvador has three biomass plants which produce about 109.5 MW of electricity. Central El Salvador receives high levels of solar radiation that are conducive to solar generation. Most of the country's installed solar panels are in government buildings, schools, manufacturing plants, and universities.

With industrial power supply solutions ranging from generator sets to battery storage to dynamic uninterruptable power supplies, we offer the broadest range of solutions, all from a single source.
