

When does the sun shine in Santo Domingo?

For Santo Domingo, this is on May 13th and July 30th. In between, the sun shines from the north, otherwise from the south. Unlike in countries that are far away from the equator, the angle of the sun is quite large here. The sun is much higher in the sky at midday and therefore shines with a high intensity.

What time does the sun rise in Santo Domingo?

During these days, the sun in Santo Domingo rises at 6:25. The Sunset can currently be watched at about 18:56 in the early evening. The cities are ordered by their geographic position from east to west, so in an approximate direction of the sun's course.

How long does a sunset last in the Dominican Republic?

While a sunset in the northern USA or central Europe can take almost an hour, in the Dominican Republic, it lasts only an average of 25 minutes. In June, it's about 26 minutes in Santo Domingo, while in December it's 25 minutes. The capital Santo Domingo is located at 19 degrees north latitude and therefore also between the tropics.

How long is a December night in Santo Domingo?

A December night in Santo Domingo lasts almost 13 hours and the days start about 60 minutes later. During these days, the sun in Santo Domingo rises at 6:25. The Sunset can currently be watched at about 18:56 in the early evening.

How far away is Santo Domingo from the equator?

The distance from the equator and the path of the sun determines not only the time of sunrise and sunset. The farther a country is from the equator, the more oblique the sun's path is to the horizon, causing sunset to last for a different duration. Santo Domingo lies on the 19th degree of northern latitude and thus a good distance from the equator.

Where is Santo Domingo located?

The capital Santo Domingo is located at 19 degrees north latitude and therefore also between the tropics. The sun swings back and forth between them over the course of the year. At the solstice on June 21, it is perpendicular above the northern tropic, and on December 21 above the southern tropic.

During these days, the sun in Santo Domingo rises at 6:16. The Sunset can currently be watched at about 19:00 in the early evening. The cities are ordered by their geographic position from east to west, so in an approximate direction ...
