

Small power inverter factory in Aarhus Denmark

Who is Danish Energy Agency?

Danish Energy Agency was established in 1976 and is part of the Ministry of Climate, Energy, and Utilities. The company has successfully featured in our top renewable energy companies in Denmark list. It is responsible for the tasks that are associated with energy production.

Who owns the energy company in Denmark?

Furthermore, it is owned by the Danish Ministry of Climate, Energy as well as Utilities. The company owns, operates as well as develops the transmission systems of electricity and natural gas in Denmark. Its main purpose is to contribute to the development of a climate-neutral energy supply.

What energy sources does Denmark use?

Currently, the country produces renewable energy from all sources possible, such as Wind, Geothermal, Solar, and Biomass. In 2012, the government of Denmark announced an Energy Agreement to eliminate the production of power from coal by 2030, going fossil-fuel-free electricity and heating system by 2035.

What is Danish renewables?

Danish Renewables develop sustainable energy projects and they focus on solar and wind energy. They develop photo-voltaic sites around the world, and they believe that solar energy has a prominent role in meeting the energy demand for electricity.

Does Denmark have solar power?

Almost 44% of electricity in Denmark is supplied from Wind and Solar Power. The installed capacity of Solar PV is said to rise by 2024 with the production of 1,140 MW. There are solar-thermal districts that exist in Denmark and The Danish Energy Agency plans to host 400 MW PV projects in the Nisum Fjord location.

Should Denmark be independent of fossil energy sources?

In the long term, Denmark must be independent of fossil energy sources, and since the operation of buildings accounts for approx. 40% of the total energy consumption in Denmark, it is necessary to have a tight but realistic strategy for both new construction and energy renovation of existing buildings.
