What is a PAYG solar system?

A PAYG (Pay-as-you-go) solar system is a home solar system that customers pay for using mobile payment technologies and mobile phone credit. This model allows for affordable energy access from renewable sources to off-grid communities, using available technologies to facilitate payment by installments.

How does a Pay-as-you-go (PAYGO) approach work?

For Pay-as-you-go (PAYGO), customers usually pay 10-20% as an upfront cost and the rest as a loan over a period of 1-2 years. It may take more than 3 years for PAYGO customers to convert product inventory into cash flow. This article explains briefly how PAYGO works for customers paying for electric services from off-grid solar systems as well as for the companies offering this service.
