Regarding the cost factor, AC pumps are better in two scenarios: in large systems (above 5 HP or 10 HP), when this type of pump starts to cost much cheaper than PM-BLDC pumps, or in systems existing ones, where there is no need to replace the pump itself, but you want to switch from diesel power (AC) to solar power (DC).

The history of solar water pumps. The idea of using the sun's power as a resource has been around since records began. The first recorded solar powered pumping systems were developed in the 19th century. This was as a result of technology evolving to directly convert solar energy into other energy forms. In these first pumps solar was ...
