

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails. For home users, a UPS can protect desktop PCs, gaming consoles, and smart home devices from unexpected power cuts.

What is an ENERGY STAR ® qualified uninterruptible power supply (UPS) system?

This model is an ENERGY STAR® qualified Uninterruptible Power Supply (UPS) system. ENERGY STAR is the trusted, government-backed symbol for energy-efficient products and practices that help save money and protect the environment. CyberPower will replace a defective UPS system (including batteries) within three years of the purchase date.

Do smart devices need an uninterruptible power supply (UPS)?

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in.

What is a 950 VA battery backup ups?

The CyberPower 950 VA Battery Backup UPS supplies power long enough for equipment to properly shut down when utility power fails. Helps prevent loss of data and minimizes the component stress caused by a hard shutdown. Save important files during power outages with this APC Back-UPS Pro compact tower.

What is a Schneider Electric back-ups 650?

Safeguard electronics from damaging power surges and brownouts with this APC by Schneider Electric Back-UPS 650 system. The CyberPower 950 VA Battery Backup UPS supplies power long enough for equipment to properly shut down when utility power fails. Helps prevent loss of data and minimizes the component stress caused by a hard shutdown.

What is the Cyberpower intelligent 1000va battery backup & surge protector?

The CyberPower Intelligent 1000VA UPS Battery Backup and Surge Protector helps prevent loss of data and minimizes the component stress caused by a hard shutdown. Protect devices during outages and power surges with this APC nine-outlet battery backup.

If so, you may have heard of an Uninterruptible Power Supply (UPS). An uninterruptible power supply automatically switches to battery power during a blackout and conditions electricity to avoid minor fluctuations in current -- often referred to as brownouts -- both of which can be devastating for sensitive equipment like desktop computers ...
