

Timor-Leste energy storage product quotation

Will CNNP move into the solar market of Timor-Leste?

The renewables unit of China National Nuclear Power (CNNP) is considering a move into the solar market of the Southeast Asian market of Timor-Leste, two sources told Infralogic. CNNP Rich Energy is interested in taking part in an international tender to develop a solar plus battery energy storage system, they said.

Does Timor-Leste need a roof-top solar energy system?

In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators. Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Can a Timor-Leste solar power plant be financed?

The tender, which was announced in February this year by state utility Eletricidade de Timor-Leste, is seeking an investor that can design, finance, operate and maintain a 72-85 MW solar power plant and a 36-43 MW battery energy project under long-term purchase agreements with the state grid in the capital city of Manatuto, the sources said.

How long will the integrated power facility last in Timor-Leste?

The duration of the integrated power facility will be about 25 years, and the bid deadline is 1 May. Renewables account for only 8% of the total electricity supply in Timor-Leste, with 99% of that coming from bioenergy and 1% from solar, according to a report issued by the International Energy Agency last year.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.
