

What is the outdoor power supply standard in Jakarta

What type of power socket is used in Indonesia?

The power sockets in Indonesia are of type C and F. The standard voltage is 230 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Indonesia.

Do I need a power adapter in Indonesia?

The standard voltage in Indonesia is 230V, and the frequency is 50Hz. Devices from countries with different voltage standards, like the United States (120V), may require a voltage converter in addition to a plug adapter. Do You Need a Power Adapter in Indonesia? Whether you'll need a power adapter depends on the type of plug your devices use.

Can I use power plugs in Indonesia?

Select your country of residence, to check the compatibility of your power plugs in Indonesia. In Indonesia, power plugs and sockets (outlets) of type C and type F are used. The standard voltage is 230 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page.

What is the standard voltage in Jakarta?

The standard voltage in Jakarta is 230V at a frequency of 50Hz. Do I need a power plug adaptor in Jakarta? If the plug shape in Jakarta is different to your home country you might need to get a travel adapter.

What type of electrical outlets are in Indonesia?

There are a couple of types of electrical outlets in Indonesia. One outlet type in Indonesia is Type C (also called the Euro plug), which has two round holes and is ungrounded. Both types will require a power adapter if you're coming from the US.

What type of power outlet do you need in Bali?

In Bali, power outlets are typically found in a two-pin socket configuration, similar to the Type C and Type F plugs mentioned earlier. However, it's worth noting that some accommodations or older buildings may have different socket types. It's a good idea to carry a universal travel adapter to accommodate various plug types.

We use WACC instead of the standard discount rate to capture the financing cost in the calculation. We assume a constant value for power generation/capacity factor over the lifetime of the plant. Finally, by summing all the cost and divide the results with total electricity generated, we could get the LCOE value of the investigated power plant.

All power sockets in Jakarta provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Jakarta if the outlet voltage in your own country is ...

What is the outdoor power supply standard in Jakarta

Indonesia operates on a 230V supply voltage and 50Hz. Power plugs and sockets. In Indonesia the power sockets used are of type C and type F. Use the photo below to help identify the right plug and socket. Plug Type C Plug Type F. Plug adapters are the interfaces between the American flat-pronged plug and Indonesia's two round-prong socket.
