Every PC case has a specific spot for the power supply unit, but the size and shape of this space can vary. Decide on a form factor to help you pick a compatible PSU. ATX and SFX are two common form factors for power supplies. SFX power supplies are more compact, designed for smaller PC cases, and easily fit into these space-constrained spaces.

The ratio of watts to VA is called the "power factor" and is expressed either as a number (i.e. - 0.8) or a percentage (i.e. - 80%). When sizing a UPS for your specific requirements, the power factor matters most. Generally, your UPS should have an Output Watt Capacity 20-25% higher than the total power drawn by any attached equipment.
