#### Do portable power stations leak energy?

Portable power stations leak energy over time. If you plan to use your power station primarily for overlanding or camping this is not an important issue: just top it off before you head out the door. However,if you plan to power up your power station and then stash it in the garage until you need it, then this is a more important issue.

#### How long does a portable power station last?

Like any battery, for example one in a phone or laptop, this will wear down over time until the power station no longer holds charge. General estimates put the lifespan of a portable power station at around ten years. Expect it to last approximately five years minimum with standard use. What can you run on a portable power station?

#### Are LiFePO4 power stations portable?

With the new LiFePo4 battery chemistry, I personally found that units in the 1000 Wh range were fairly portable, while those that were closer to 1500 Wh were more of a chore to pick up and move around. Power stations that stood out as especially difficult or easy to move around have been noted in the individual reviews.
